

# STPro!

# Shipment Tracking Pro!

# ACS GROUP

ACS Group announces "STPro", Shipment Tracking and Accounting Software for the freight forwarding, moving and transportation agent industries.

Do you need a better plan for managing your information? Do you have an older system that needs updating? More so than ever, your ability to capture and retrieve real-time shipment information is going to be critical to your success as a Forwarder, Mover or Agent.

ACS Group software and services have been assisting companies in your industry for the past ten years to track shipments, improve efficiency with greater output, reduce labor costs, and lower the overall cost of doing business. STPro is easy to use and can also be adapted to work with current systems.

Each software program we deliver is customized to fit the individual needs of our clients.

Shipment Tracking Pro (STPro) is a suite of software modules that allow companies to manage every aspect of their military or commercial, international or domestic shipment information. Purchased as a whole, STPro integrates operational and accounting data with direct DoD EDI invoicing and payment notification. Some STPro modules can also be purchased individually depending on your specific needs. In addition, a new service will allow smaller carriers or those with low billing volumes to enter and transmit EDI billings direct from ACS Group servers. This service will be offered as a monthly service.

1. Transportation Provider enters shipment and billing information in STPro.
2. Shipments ready to be billed are sent over a secure Internet connection via HTTPS to PowerTrack.
3. PowerTrack /CWA receives billing via EDI, processes the information and produces an acknowledgement.
4. Provider receives payment via EFT. STPro automatically records and posts payments to correct shipments.

## NEW!

## PowerTrack Automated Billing

SDDC will no longer accept paper invoices or vouchers for payment to DoD Transportation Providers. Are you ready for the new change to Powertrack? The latest version of STPro does Powertrack and has the following features:

- Complete and totally integrated solution for meeting your Powertrack / EDI billing requirements
- Automated calculations using International and Domestic tariffs, Mileage lookup via PC Miler, and Address and Location by City / State / Gbloc.
- Fully customizable; Integration with your accounting software

Our new version of STPro will save you time and money by avoiding costly processing fees, as well as, allow you to have complete control of your critical shipment information.

Shipment Tracking Pro!

ACS Group (800) 550-8007 x26
